EDUCATION

University of Waterloo

Bachelor of Computer Science

Waterloo, ON

Sept 2025 – Apr 2030

Wilfrid Laurier University

Bachelor of Business Administration

Waterloo, ON

Sept 2025 – Apr 2030

EXPERIENCE

Founding Engineer

Cache (Antler 24)

Feb 2026 – Present

Toronto, ON

- Architected a React web app and iOS Swift app from the ground up, scaling to 5,000+ users and 10,000+ orders across 20+ countries with Stripe payments and international shipping integrations
- Deployed autonomous AI bots and a personalized recommendation engine, reducing operational overhead by 70% and increasing user engagement by 35%
- Owned the full technical roadmap across frontend, mobile, and backend, delivering a UI/UX redesign that cut initial load time by 60% and improved Lighthouse score from 58 to 91

Software Engineering Intern

Temerity Analytics

April 2026 – Present

Toronto, ON

- Built 50+ secured Django REST API endpoints with RBAC and request validation, sustaining sub-100ms response times across all production routes
- Engineered PostgreSQL-backed data visualization dashboards in Angular, contributing 20K+ lines of production code and reducing analyst reporting time by 40%
- Tuned PostgreSQL schemas with compound indexing and query optimization, cutting latency by 40% and enabling 10x dataset scale without infrastructure changes

Frontend Developer Intern

ZEVA Global

April 2026 – Present

Toronto, ON

- Rebuilt the company website from Figma to production in Svelte and TypeScript, cutting Time-to-Interactive from 4.2s to 1.7s via lazy loading, prefetching, and a modular component architecture
- Deployed AWS S3 and CloudFront for static asset delivery, reducing asset load latency by 70% and decoupling media hosting from the core application

Software Engineering Intern

Local Reach

Nov 2024 – Mar 2025

Kingston, ON

- Built a YOLO computer vision pipeline with OpenCV for retail TV display recognition, achieving 30+ FPS at sub-500ms latency; acquired by Taiv (YC W20)
- Trained a 3-layer neural network audio classifier on MFCC, mel-spectrogram, and chroma features, reaching 92% accuracy over 64 training epochs

TECHNICAL SKILLS

Languages: TypeScript, Python, JavaScript, Racket, C, HTML/CSS, SQL (Postgres), Swift, Go

Technologies: React, Node.js, Django, Next.js, TensorFlow, TailwindCSS, Angular, Svelte

Tools: Git, Docker, Chrome DevTools, Microsoft Office, AWS, Supabase, Google Cloud, Figma

PROJECTS

Japanese to English AI Translator | *TypeScript, Next.js, PostgreSQL, Supabase, Docker, TailwindCSS* Nov 2025 – Feb 2026

- Engineered a Swift and SwiftUI audio pipeline for real-time microphone, application, and system audio capture with local English/Japanese transcription and translation using Apple Speech and WhisperKit
- Built asynchronous inference and language-routing workflows with incremental transcript streaming, model lifecycle management, and native macOS voice typing and floating caption overlays

Forex Predictor | *Python, Scikit Learn, Pandas, NumPy, Matplotlib, YFinance*

Sept 2025 – Dec 2025

- Engineered 90+ features from RSI, MACD, and macroeconomic indicators, training Random Forest and Gradient Boosting models to achieve 93% directional accuracy and $R^2 = 0.84$ on EUR/USD next-day returns
- Automated ingestion and evaluation pipelines via the Yahoo Finance API, processing 100,000+ historical data points across multiple currency pairs spanning 25 years
